

## Dodds–Roundhill Coal Gasification Project Community Newsletter January 2010 – Issue #10

This periodic newsletter is intended to keep the community informed on the status of the Dodds–Roundhill Coal Gasification Project.

### Project Update

All of us at Sherritt would like to take this opportunity to convey our warmest wishes to you and your Community for a safe and prosperous New Year.

Since our previous newsletter, the global economy has started to show some positive signs of recovery. However, the slower than expected decline in costs for the Project, depressed commodity prices and markets, and evolving federal and provincial greenhouse gas (GHG) regulations continue to limit progress on the Project at this time. We will continue to consult with the provincial and federal governments to help us determine the impact of potential GHG regulation as it unfolds.

We will continue to assess Project plans as economic conditions change and will provide the community with timely updates.

### Contact Us

We will communicate news and updates on the Project through newsletters. If you have any questions, we encourage you to visit [www.sherritt.com](http://www.sherritt.com) for updates or email or phone us at the contact information listed below.
